PETITION FOR WITHDRAWAL OF HOLDING OF ABANDONMENT

Mail Stop Petition
Commissioner of Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Sir:

Applicants respectfully petition for the withdrawal of the holding of abandonment of the present application as indicated in the Notice of Abandonment for failure to timely file a proper reply to the Office Action mailed on February 9, 2004, a copy of which is attached hereto. Please charge the fee for filing this Petition, and any other necessary fees, to our Deposit Account No. 07-0832. Applicants respectfully request that the Notice of Abandonment be withdrawn based upon the fact that Applicants timely filed a reply to the outstanding Office Action, and received acknowledgement of the receipt of the reply. The undersigned practitioner, as the attorney of record, makes the following statements in support of this Petition:

I, Joseph J. Kolodka, hereby attest to the fact that a search of the file jacket and docket records substantiates that Applicants timely filed a reply on July 28, 2004, to an Office Action having a shortened period for response set to expire on May 9, 2004. The reply included a Response and a Petition for Extension of Time Under 37 C.F.R. 1.136(a). Applicants received a return postcard indicating receipt of the reply by the USPTO on July 30, 2004. Enclosed with this petition are a copy of the reply filed in response to the outstanding Office Action, which is attached as Exhibit A, and a copy of the return postcard, which is attached as Exhibit B.

In view of the above, Applicants submit that a timely reply was filed and properly received by the USPTO, and accordingly, respectfully request that this Petition be granted and the outstanding Notice of Abandonment be withdrawn. Please charge any fees associated with the Petition to Deposit Account 07-0832. If there are any further questions regarding this Application, please contact the undersigned at 609-734-6816.

Respectfully submitted,

Joseph J. Kolodka

24 **RESPONSE TO ACTION MAILED 9 February 2004 (Paper No. 10)**

Dear Sir:

This communication is responsive to the Office Action dated 9 February 2004. Kindly
enter the following amendments:

30 **Amendments to the Claims** are reflected in the listing of claims that begins on page 2 of this
paper.

36 **Remarks** begin on page 6 of this paper.

This listing of claims replaces all prior versions and listings of claims in the application:

6

1. (Currently Amended) Method for automatically matching the levels of the signals exchanged between a first apparatus and a second apparatus which communicates with the said first apparatus via a transmission line, characterized in that it comprises the following steps:

the signal which comes from the transmission line and is received by the first apparatus is digitized,

12 on the basis of the digital data representing the signals exchanged with the transmission line, an estimate is made of the transfer function equal to the ratio of the signal received by the first apparatus to the signal transmitted by the first apparatus, the estimate of the transfer function is defined in the following way:

$$\frac{OUT2}{IN1} = K(Z_L) + \varepsilon$$

where

18.
$$K(Z_L) = \frac{Z_L}{2 \cdot (Z_L + 2 \cdot R_1)}$$

and Z_L represents the impedance of the transmission line, while R_1 represents the source impedance of the transmission line,

- the following are calculated:

for the transmitter signal, the first gain $G1$

$$G1(Z_L) = \frac{1}{1 - 2 \cdot K(Z_L)}$$

24 and for the received signal, the second gain $G2$

$$G2(Z_L) = \frac{1}{1 - 2 \cdot K(Z_L)}$$

each of the exchanged signals is respectively multiplied by a suitable gain determined on the basis of the estimated value of the said transfer function.

2. (Cancelled)

30

3. (Previously Presented) Method according to Claim 1, characterized in that the gain of the
6 signal received by the first apparatus is chosen so that the component of the signal transmitted by
the second apparatus in the signal received by the first apparatus is independent of the impedance
of the transmission line.
4. (Previously Presented) Method according to Claim 1, characterized in that the gain of the
12 signal transmitted by the first apparatus is chosen so that the component of this signal in the
signal received by the second apparatus is independent of the impedance of the transmission line.
5. (Previously Presented) Method according to Claim 3, characterized in that the said
calculation method implements an identification algorithm.
6. (Cancelled)
- 18
7. (Currently Amended) Device according to Claim [[6],] 12 characterized in that the block
has a unit for identifying the transfer function interacting with a calculation module which is
intended to supply a first amplification means with the first gain for matching the level of the
signal transmitted by the first apparatus, and to supply a second amplification means with the
second gain (G2) for matching the level of the signal received by the first apparatus.
- 24
8. (Currently Amended) Device according to Claim [[5],] 12 characterized in that the
calculation block has a DSP circuit implementing an identification algorithm.
9. (Previously Presented) Device according to Claim 8, characterized in that the
identification algorithm is of the LMS, RLS or Kalman type.
- 30
10. (Previously Presented) Communication apparatus, characterized in that it has a device
according to Claim 6.
11. (Previously Presented) Method for automatically matching the levels of the signals

exchanged between a first apparatus and a second apparatus that communicates with the first apparatus via a transmission line, comprising the steps:

receiving and digitizing by the first apparatus the signal which comes from the transmission line,

estimating, on the basis of the digital data representing the signals exchanged with the transmission line, the transfer function (K) equal to the ratio of the signal received by the first apparatus to the signal transmitted by the first apparatus, the estimate of the transfer function

12 (K) comprising $\frac{OUT2}{IN1} = K(Z_L) + \varepsilon$ where $K(Z_L) = \frac{Z_L}{2 \cdot (Z_L + 2 \cdot R_1)}$ and Z_L represents the

impedance of the transmission line, while R_1 represents the source impedance of the transmission line, the following are calculated: for the transmitter signal, the first gain $G1$

comprises $G1(Z_L) = \frac{1}{1 - 2 \cdot K(Z_L)}$ and for the received signal, the second gain $G2$ comprises

$$G2(Z_L) = \frac{1}{1 - 2 \cdot K(Z_L)}, \text{ and}$$

multiplying each of the exchanged signals, respectively, by a suitable gain determined on

18 the basis of the estimating of a value of the transfer function (K).

12. (Previously Presented) Device for automatically matching the levels of signals exchanged
 6 between a first apparatus and a second apparatus communicating via a transmission line, characterized in that it has:

an analogue/digital converter capable of digitizing a signal entering the first apparatus,
 a digital/analogue converter capable of converting a signal transmitted by the first
 apparatus,

12 a calculation block intended to estimate the ratio of the incoming signal to the signal
 12 transmitted by the first apparatus, and to determine the gains needed for matching the levels of
 the signals transmitted and received by the first apparatus, the gains being dependent a transfer
 function (K) equal to the ratio of the incoming signal received by the first apparatus to the signal
 transmitted by the first apparatus, the estimate of the transfer function (K) comprising

$$\frac{OUT2}{IN1} = K(Z_L) + \varepsilon \quad \text{where} \quad K(Z_L) = \frac{Z_L}{2 \cdot (Z_L + 2 \cdot R_1)} \quad \text{and } Z_L \text{ represents the impedance of the}$$

transmission line, while R_1 represents the source impedance of the transmission line, the
 18 following are calculated: for the signal transmitted, the first gain $G1$ comprises

$$G1(Z_L) = \frac{1}{1 - 2 \cdot K(Z_L)} \quad \text{and for the incoming signal received, the second gain } G2 \text{ comprises}$$

$$G2(Z_L) = \frac{1}{1 - 2 \cdot K(Z_L)}$$

REMARKS

Reconsideration of the application is respectfully requested.

Claims 11 and 12 are indicated as allowed. In reply to claim 2, the subject matter of claim 2 has been incorporated into claim 1 and claim 2 has been cancelled.

Claim 6 has been cancelled and claims 7 and 8 have been amended to depend from allowed claim 12.

Favorable reconsideration of this application is respectfully requested. Should there be any questions or other matters whose resolution may be advanced by a telephone call, the Examiner is cordially invited to contact Applicant's undersigned attorney at his number listed below. Any fees due and owing should be charged to deposit account no. 07-0832

Respectfully submitted,

PETITION FOR EXTENSION OF TIME UNDER 37 CFR 1.136(a)

Docket Number (Optional)
PF970008

In re Application of Christophe Lorin

Application Number 09/367,623

Filed 11/23/99

For Method for Automatically Matching the Levels of the Signals
Exchanged in a Communication Network

Art Unit 2644

Examiner J.F. Harold

This is a request under the provisions of 37 CFR 1.136(a) to extend the period for filing a reply in the above identified application.

The requested extension and appropriate non-small-entity fee are as follows (check time period desired):

- ☐ One month (37 CFR 1.17(a)(1)) \$ _____
- ☐ Two months (37 CFR 1.17(a)(2)) \$ _____
- ☒ Three months (37 CFR 1.17(a)(3)) \$ 950
- ☐ Four months (37 CFR 1.17(a)(4)) \$ _____
- ☐ Five months (37 CFR 1.17(a)(5)) \$ _____
- ☐ Applicant claims small entity status. See 37 CFR 1.27. Therefore, the fee amount shown above is reduced by one-half, and the resulting fee is: \$ _____.
- ☐ A check in the amount of the fee is enclosed.
- ☐ Payment by credit card. Form PTO-2038 is attached.
- ☐ The Director has already been authorized to charge fees in this application to a Deposit Account.
- ☒ The Director is hereby authorized to charge any fees which may be required, or credit any overpayment, to Deposit Account Number 07-0832.

I have enclosed a duplicate copy of this sheet.

- I am the ☐ applicant/inventor.
- ☐ assignee of record of the entire interest. See 37 CFR 3.71
- Statement under 37 CFR 3.73(b) is enclosed. (Form PTO/SB/96).
- ☒ attorney or agent of record. Registration Number 39731
- ☐ attorney or agent under 37 CFR 1.34(a).

Registration number if acting under 37 CFR 1.34(a). _____

WARNING: Information on this form may become public. Credit card information should not be included on this form. Provide credit card information and authorization on PTO-2038.

July 27, 2004
